

# Mobil DTE 10 Excel™ 68 improves Energy Efficiency by 2.3% in Sumitomo Demag injection moulding machines.\*

Energy lives here™

## Sumitomo Demag Injection Moulding Machines | General Manufacturing-Plastics | Greece

### Situation

A large plastics plant in Greece wanted the best lubrication solution for the facility's 40 Sumitomo Demag injection moulding machines, to both improve productivity and also reduce the operating costs of the facility. Particularly as energy consumption in these machines is a significant expenditure.

### Recommendation

ExxonMobil's Authorized Distributor Novitron & ExxonMobil engineers recommended to upgrade from the competitors product to the energy efficient zinc-free hydraulic fluid **Mobil DTE 10 Excel™ 68**, thereby reducing energy consumption and further extending the oil drain intervals of the machines and improving general system cleanliness.

**Mobil DTE 10 Excel™ Series** are high performance anti-wear hydraulic oils specifically designed to meet the needs of modern, high pressure, industrial and mobile equipment hydraulic systems.

### Benefit

**Mobil DTE 10 Excel series** lubricants improved energy efficiency. The plant's technical team made an energy efficiency by testing 2 DEMAG EI-Exis SP 250 injection machines, operating with the same parameters, and comparing it to the competitor's product. The result? **Mobil DTE 10 Excel 68** improved energy efficiency by 2.3% in the DEMAG EI-Exis SP 250 injection machine. For a facility with 40 injection machines, this corresponds to potential annual savings of over € 17,000.

Advancing Productivity™

### Advancing productivity

Helping you reach your Safety, Environmental Care\*\* and Productivity goals through our innovative lubricants and services is our highest priority. That's Advancing Productivity. It's how we help you achieve your broader vision of success.

\* This proof of performance is based on the experience of a single customer. Actual results can vary depending upon the type of equipment used and its maintenance, operating conditions and environment, and any prior lubricant used.

\*\* Visit [mobil.com/industrial](http://mobil.com/industrial) to learn how certain Mobil-branded lubricants may provide benefits to help reduce environmental impact. Actual benefits will depend upon product selected, operating conditions and applications.
