

Lubrication recommendation

Energy lives here™

- This service provides expert guidance in selecting the proper lubricants for your equipment, which can help minimize costly maintenance and repairs while providing optimum protection to your assets.

Description

Experienced ExxonMobil engineers assess your current lubricants and recommend, when required, more effective product choices to help maximize equipment reliability for optimum productivity.

Safety, health and environment

The ExxonMobil team will:

- Be attuned to the hazards of handling, storing and using petroleum products
- Coordinate efforts through designated plant personnel
- Strictly observe the site's safety rules and ExxonMobil safety practices
- Verify equipment electrical and mechanical lockout, proper tagging and potential explosion hazards
- Provide recommendations to reduce the hazards of spill, leakage and fire
- Provide product safety data for our lubricants
- Be available to support safety training

Potential benefits

Ensure the correct lubricant selection

Ensure optimum equipment operation

Minimize costs for failures

Enhance operational efficiency

Application

To implement this service, we'll work with you to ensure the proper selection of ExxonMobil lubricants in accordance with application, operating conditions, specifications, and where appropriate, Equipment Builder recommendation.

Industrial
Lubricants

By helping you enhance equipment life and reliability — which minimizes maintenance costs and downtime — our expert services can help you achieve your safety, environmental care and productivity goals.
